Lake of the Ozarks  
NWP 18/36~~X~~

**\*\*\*Water Quality Certification for NWP 3 was reissued on June 7, 2000, the effective date of the modified NWP. See NWP 3 water quality certification under the New and Modified Nationwide Permits heading.\*\*\***

Dear Mr. Cavin:

The Missouri Department of Natural Resources, Water Pollution Control Program, has developed this Water Quality Certification for use at Lake of The Ozarks for similar classes of activities occurring at the Lake. Activities which are permitted by the Corps using Nationwide Permits 18, 36 or ~~X~~ at the Lake of the Ozarks are included in this general certification.

This office certifies that the ongoing activities apparently will not cause the general or numeric criteria to be exceeded nor impair beneficial uses established in Water Quality Standards, 10 CSR 20-7.031, provided the following conditions are met.

1. Best management practices shall be used during construction to limit the amount of sedimentation into the lake.
2. The activities shall be conducted during times of low water and no work shall be done in the water between March 15 and June 15 to avoid adverse impacts on spawning habitat.
3. Only clean, nonpolluted material shall be used.
4. Excavation shall be limited to that amount necessary to provide boat access to the dock and channel from the dock to the open water of the lake.
5. Excavation materials shall be disposed of in an upland, nonwetland location.

Water Quality Standards must be met during any operations authorized by these permits. If you have any questions, please call Terri Ely or John Madras of the Planning Section at (573) 751-7428. If there are any requested modifications of these conditions based on site specific considerations, please contact this office.

This certification is being issued under Section 401 of Public Law 95-217, The Clean Water Act of 1977. Authorization of an activity by this certification does not authorize the "take" of a state listed endangered species under the Wildlife Code of Missouri, nor does it imply compliance with any other state or local requirements.

Sincerely,

WATER POLLUTION CONTROL PROGRAM
